

Hypercom® 1MB T7Plus Terminal

The Challenge

Today's merchants need more than just another terminal. To stay competitive, they need a terminal that brings new value-added services to the point-of-sale (POS). Processing credit, PIN-secured and signature debit and gift cards, plus checks is just the beginning of what merchants expect from a terminal — especially in light of today's global economy as they strive to provide enhanced services to a diverse customer base.

The Solution

The Hypercom® 1MB T7Plus terminal offers more memory and convenience, as well as an upgraded feature set from the original T7Plus model. It quickly processes all major payment types and delivers fast, accurate online transaction authorizations. In addition, the T7Plus terminal is designed for future flexibility with connections for new and existing peripheral payment acceptance devices. It also offers "one-touch" operation for a wide range of functions and specific applications for restaurants, retailers, lodging, and other industries.

Here's How It Works

The Hypercom 1MB T7Plus terminal quickly processes all major credit cards (including Visa®, MasterCard®/Diners Club®, American Express®, Discover® and JCB®), as well as gift cards and Level I & II Business and Commercial purchasing cards. Through peripheral products, it also supports PIN and signature debit transactions as well as paper checks.

To help protect your customers from fraud and identity theft, the T7Plus terminal generates receipts with only the last four digits of the card number showing. It also operates with manager password controls to help ensure transaction security.

Hypercom® 1MB T7Plus Terminal

Industries Served

- Retailers
- Restaurants
- Quick Service Restaurants
- Mail order/Telephone order
- Travel & Entertainment (Lodging)
- Gas Stations
- Supermarkets

Help Your Business

- Generate receipts faster with one-touch operations for quicker transactions and checkout time
- Offer the convenience of more payment options
- Improve customer service and increase customer loyalty
- Prevent unauthorized downloads

Help Your Customers

- Built-in identity theft and fraud protection tools
- More payment options
- Fast transactions and quick receipt printing

Features

- One-touch functionality for a wide range of transactions
- Drop-in paper loading
- Faster printing
- Compatibility with Hypercom® S9 and S9C PIN pads
- Integrated thermal printer
- 1 MB of storage
- Special industry-specific applications
- Advanced fraud/identity theft protection tools
- Feature-rich terminal with small footprint
